# About The Project:

Aferverse is a Blockchain Platform designed to be a cross-chain NFT platform and Metaverse. It is also Africa's largest NFT Market Place which will grow to become the leading Metaverse project in Africa. The Project seeks to bring to life the rich heritage of people from African decent, culture and history. From music, to Sports, From Politics to Fashion. The platform will serve as a place where everyone around the world can experience Africa as they should in real life.

Aferverse will bring to life the Museums of Africa, fashion, culture, politics and even resources in a way that is decentralized and transparent. Unlike other Projects, the platform will allow people to buy lands and develop model African cities to represent what the future cities in Africa could be like.

The Land in the Aferverse will be catalogued to represent specific geographical locations on the continent and will reflect their history and culture. The owners and developers of such land can then monetize it however they chose
The key ideas the project will focus on at stage one is NFTs and a great marketplace. Unlike other platforms where you only buy and hold your NFTs on their platforms, with Aferverse you can take your NFT wherever you want it. On the platform, you would be able to buy and sell using the Platforms Native Token AFER.

Great Projects like the Indomitable Legends, a project that show cases Africa's football Legends will be launching on the AferVerse marketplace, followed by the Eden Legends Project, which is another NFT project that will be celebrating Legends from Africa, from a wide variety of backgrounds, music, sports, politics, philanthropy, business, military, history as well as current celebrities and people of impact.

# Executive Summary

## AFERVERSE

is a virtual ecosystem that aims to celebrate and promote the history, wealth and creativity of the African continent in a new light.

The goal of this project is to become a beacon and fuel for creativity, cultural and technological innovation on the African continent. The project also aims to celebrate all cultural heritage that originates from the African continent, from music, art, football, politics, science and religion.

# Vision:

Our vision is to build the largest Afro-centric metaverse and through it provide liquidity to the African market by leveraging available resources, culture and history using blockchain technology.

# Mission:

The African heritage is very rich and colorful. Through our platform we aim to be able to bring decentralization, transparency, and accountability to the African continent in sectors such as sports, arts, music and heritage.

To do this we aim to build Africa's largest Metaverse. The platform will host an NFT marketplace where participants can mint and sell their NFTs, virtual lands and countries mimicking the various historic lands on mainland Africa.

The marketplace will allow people design and sell afro-centric wares, and trade in goods and services. Host concerts, build their own virtual worlds and play Afro-centric games within the metaverse.
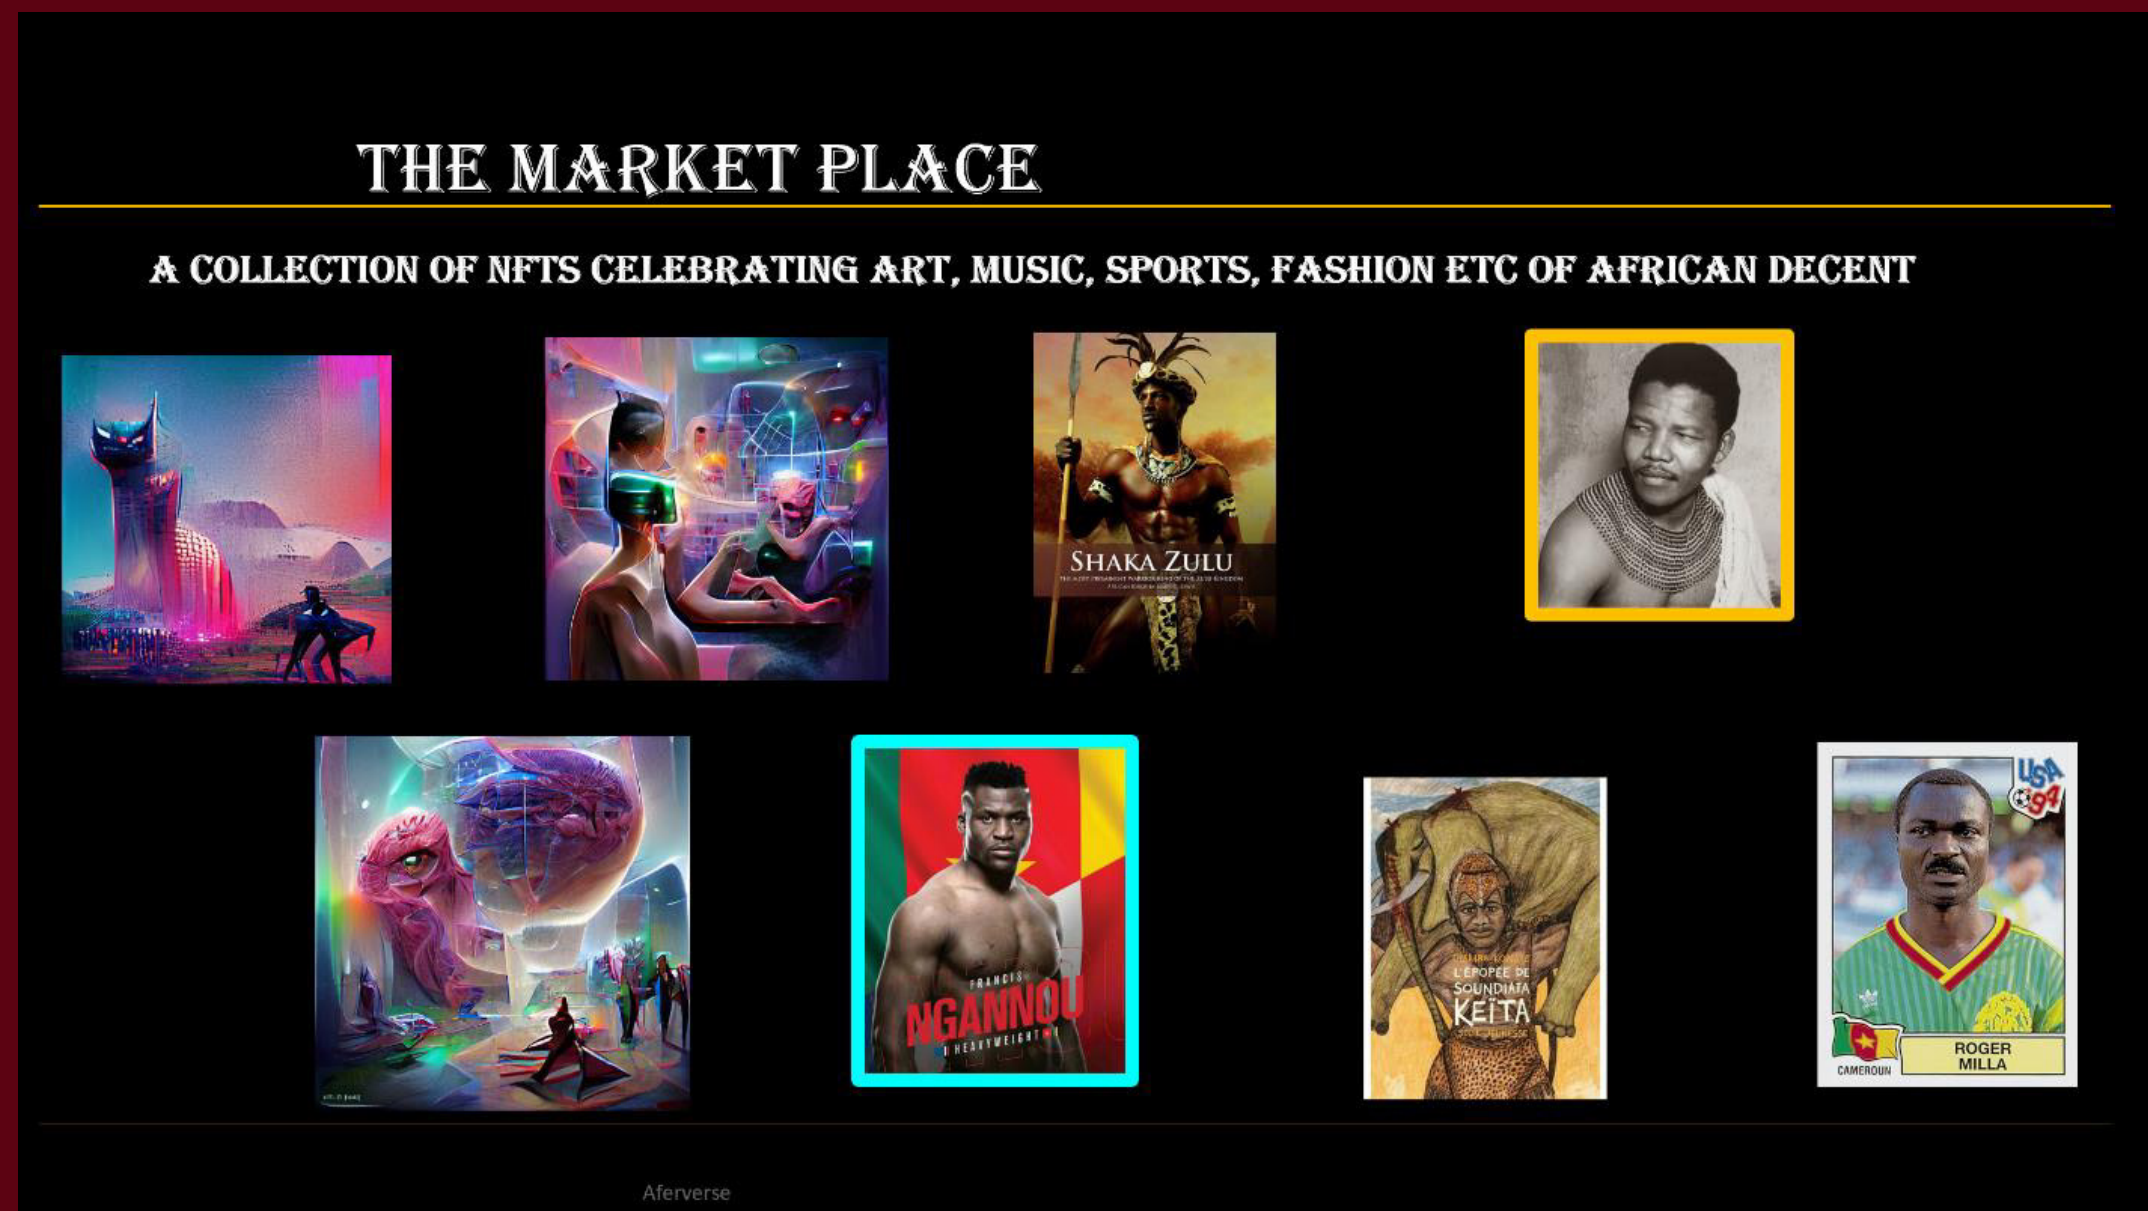

# Afer (The Token)

The AFER token (AFER) will be the vehicle that enables the whole world to participate in the development and flourishing of the Aferverse A fuel for innovation and transformation The Aferverse will use blockchain technology and NFTs to empower creativity, sports, music and technological development with real world impact through multiple applications.

Through the use of NFTs and the AFER tokens (AFER) users will be able to:

- **Interact with all applications:** Buy assets, trade, play and exchange with others. Fund individual projects, Vote and fund projects and application that will be build and listed on the Aferverse
- **Staking:** The AFER token (AFER) allows for staking , which enables one to passively earn further AFER

- **Fee Capture:** 5% of all transaction volume carried out in AFER tokens (Transaction Fees) shall be allocated with 50% to the Staking Pool as rewards for token holders that Stake AFER tokens and 50% to the ''Foundation.''
- **The Foundation:** The role of the Foundation is to support the ecosystem, offering grants to incentivize high quality content and production on the platform. The value of the Aferverse will grow through the valuation of all projects and experiences funded by the Foundation thus creating a positive circle that will enable the funding of bigger and better projects.

# 1) The Nft Market Place And Land Sale

Unlike most NFT projects that use other marketplaces, Aferverse aims to build and own its own NFT marketplace. This is a very vital first step that will ensure the success of the whole project.

This will also add value to token holders who will share in the proceeds of minting fees on the platform, and above all the platform will give Aferverse the leverage to build on all its other phases without interruption.

## 2) The Indomitable Legends: Phase 1

This will be the pilot and first NFT project to be carried out on the Market place. This pilot project aims to mint bespoke cards and create avatars for football legends that have played on the Cameroonian National team.

It aims to capture the relics and glory of the football players that have created a lasting memory in the minds of football lovers worldwide.

The success of this has already been secured through MOUs with the FECAFOOT President Mr Samuel Eto'o Fils, as well as with MOUs with other legendary footballers such as Albert Roger Milla, Omah Bilik.

2 (a): Based on the Success of the Indomitable Legends, we will aim to repeat the same for at least four (4) African countries who must have participated in at least four international competitions after progressing through the qualifiers.

The tournaments they must have participated in will include the African Cup of Nations, The World Cup, The Olympics and The Confederation Cup.

## 3) AFCAN LEGENDS: PHASE 2

The third phase of stage one is the AFCAN LEGENDS. In this stage the project will be celebrating African Football legends of all times from different Nations of Africa. Then each individual National Team project will ensue similar to the Indomitable Legends NFT collection.

For a full capture of the Football Heritage, 8 countries will be chosen to work with based on specific merits like how many legends it has produced, participations at the World Cup, African Nations cup, Olympics and confederation cups.
## 4) Legends Of Eden: Phase 3

The fourth part of phase one, will be called the Legends of Eden. This will be the stage at which Aferverse will then show case some of the most prominent figures of African descent. It will be an NFT collection that celebrates prominent figures throughout the history of Africa and Afro-America, Afro-Caribbean, Afro-European etc From kings and Queens, political and military leaders to sport and science personalities as well as celebrities and actors.

The first stage of this amazing project will be all about creating unique NFTs collectibles that will be used to interact with different events, games, campaigns within the AFricMetaverse. From taking part in sport competitions, to historical, political and military campaigns and a selection of games and projects curated by our community of studios and creatives.

# Land Sales On The Aferverse: Phase 4

Phase four will gradually ease the project into the Metaverse. This will be launched Q4 2025. With the beginning of land sales on the Aferverse to the general public, others will be allowed in to build their own virtual worlds on the Aferverse, and to monetize them as they desire. By this time also the technology on Aferverse would be fully mature to usher in the next stage of the project.

# Second Stage (2026 - 2027)

- Tournaments and competitions
- Play to earn
- Avatars or Metaverse personalities

By 2026 we will be looking at building avatars for all our legends, customizing them to become players and personalities within the Aferverse. Therefore, at this stage we will launch a number of competitions and tournaments that will involve the use of all Legends NFT.  NFTs owners will be able to enter these arenas and compete to win their respective Bi-weekly AFER token (AFER) prizes and much more.

By 2026 we will be looking at building avatars for all our legends, customizing them to become players and personalities within the Aferverse. Therefore, at this stage we will launch a number of competitions and tournaments that will involve the use of all Legends NFT.  NFTs owners will be able to enter these arenas and compete to win their respective Bi-weekly AFER token (AFER) prizes and much more.

With the above accomplished, we will aim to bring the various legend avatars across the chains to represent the legends they represent on the Aferverse. For example, an Avatar of Roger Milla could become a guest speaker at a football gathering in another metaverse platform or virtual world. So Aferverse will aim to make its NFTs and Avatars rentable or traded between platforms.

2 (a): Based on the Success of the Indomitable Legends, we will aim to repeat the same for at least four (4) African countries who must have participated in at least four international competitions after progressing through the qualifiers.  The tournaments they must have participated in will include the African Cup of Nations, The World Cup, The Olympics and The Confederation Cup.

# Third Stage (2028)

- Virtual immersion
- Play to Earn
- Explore and Learn to Win and Earn

The virtual immersion stage will enable the customization of individual avatars and the VR exploration of key arenas throughout the Aferverse. From exploring amazing geographical and historical locations on the Aferverse to participating in historical events. Users will embark on safaris, expeditions, battles, treasure hunts and much more from the comfort and safety of their home.

# The Aferverse

A unique platform where users will be able to create and interact with quality 2D, 3D and 4D contents. They will be able to hold ownership of their arenas, and experiences. Conduct trading, earn rewards and create a positive real-world impact.

## Developers
Will be able to create add ons, plugins and other standalone arenas and experiences.

## Scanned 3D Models
3D scanning capabilities will be provided to individual studios and creatives to support their effort of creating new assets for the legends.

## Creatives
Will be able to easily import their work into the network and turn these into unique NFTs.

## Project Owners
Real world projects that will be supported and funded by the Foundation in order to enable the creation of more immersive experiences and social impact.

## Lands, Arenas, Experiences
Users will be able to buy Land in the Aferverse on top of which different Arenas and Experiences will be created, While the value from the monetization of experiences and arenas will go toward their creators; these creators will have to pay rent to the land owners.
Users will be able to sell and trade and license their Experiences and Arenas.

# Architecture

The ecosystem is a project build on the Polkadot network. The architecture leverage Bit.Country as the Framework and application layer. This will allow us to build a product that is natively interoperable. Aferverse will leverage the EVM- compatibility blockchain of Bit. Country.

The project will leverage the EVM- compatibility blockchain of Bit. Country.

Below is an overview of the architecture

# Utility:

Buy NFTs : Afer can be used within Aferverse to purchase virtual assets such as NFT cards, avatars and other in game items.

BUY,SELL & Lease virtual real estate : Tokens can also be used to purchase land in prime real estate are such as next to a football stadium, museum,etc.

Advertisement and sponsorship: Afer can be used to purchase advertising space that can be resold or lease to generate income.

Staking : You can also participate in supporting the ecosystem and earn a passive income. Staking will also be use to participate in the governance of the project.

Exclusivity : User will have exclusive access of events and some of the most exciting , original artist NFTs from Africa and around the world.

# Tokenomics

## Tokens Issuance & Distribution

| Item | Percentage | Amount |
|------|------------|--------|
| Seed Sale | 7% | 70,000,000 |
| Strategic Sale | 3% | 30,000,000 |
| Public Sale | 10% | 100,000,000 |
| Foundation | 20% | 200,000,000 |
| Treasury | 15% | 150,000,000 |
| Reserve | 25% | 250,000,000 |
| Team | 15% | 150,000,000 |
| Advisors | 5% | 50,000,000 |
| Total supply | 100% | 1,000,000,000 |

The revenue from the Public Sale will be used to ramp up the development of the Second stage and to lay the foundations for the Third Stage.
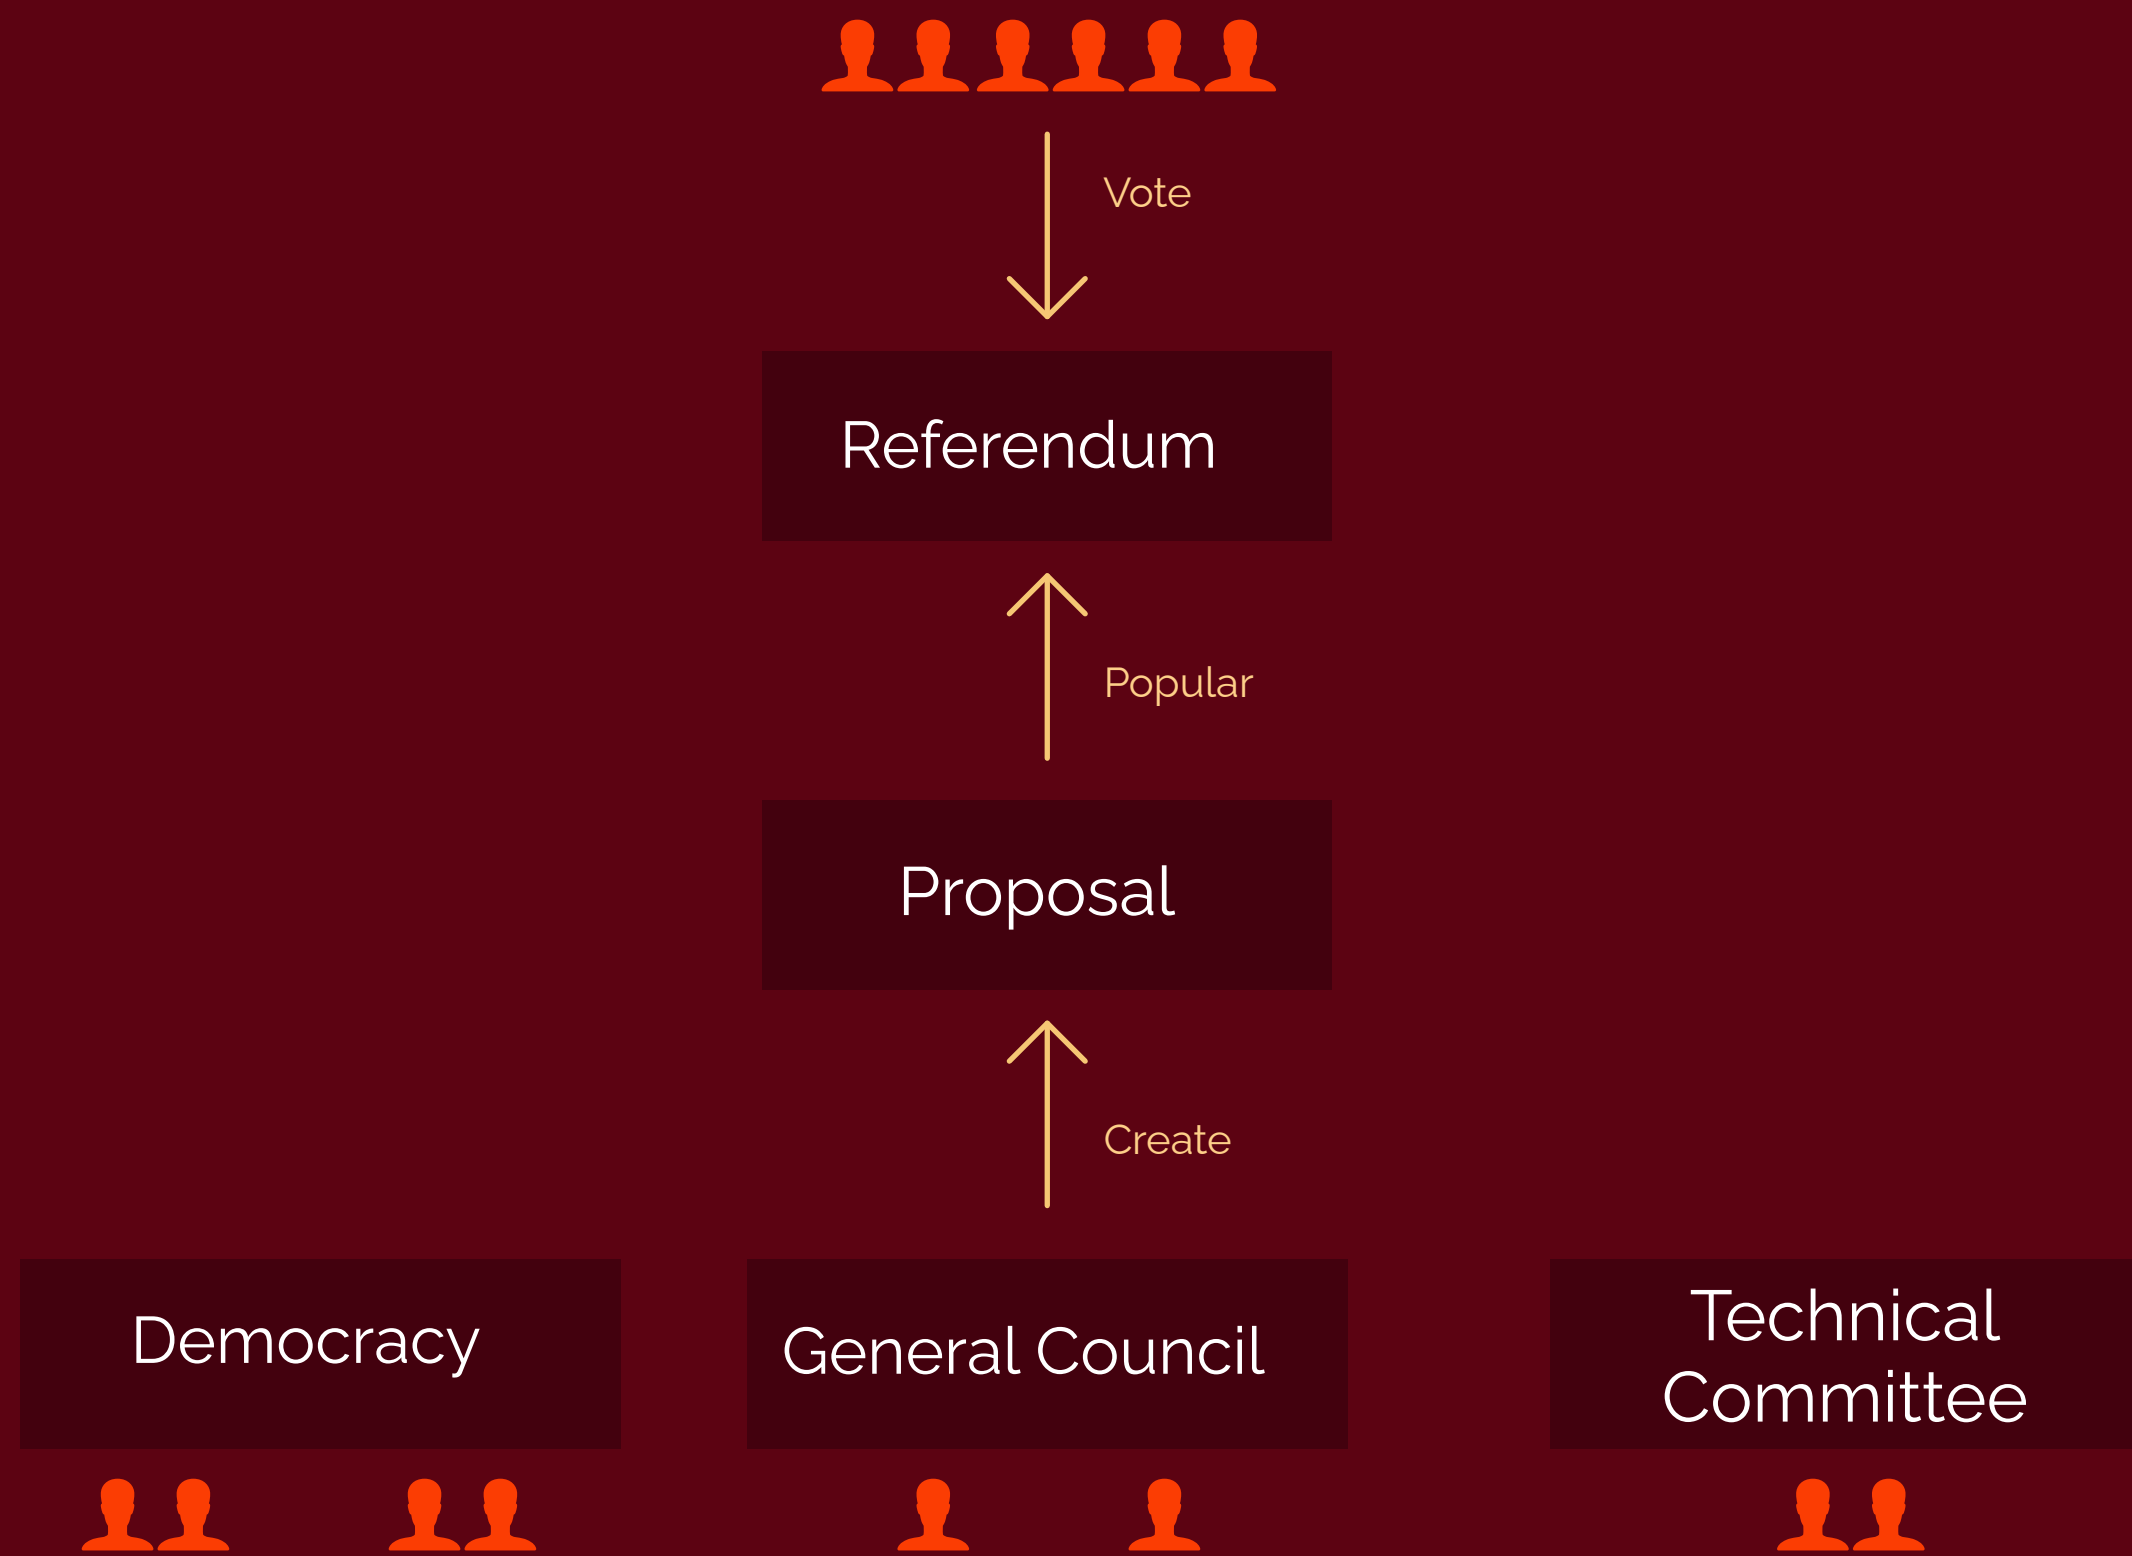

## From The Treasury (15%)

| | |
|---|---|
| Development team and infrastructure | 45% |
| Marketing and acquisitions | 45% |
| Security, Legal and Compliances | 7% |
| Administration and General expenses | 3% |

## Governance:

Decentralization is a key pillar of Aferverse. This will be achieved progressively over multiple phases, governance will pass from the centralized councils (Foundation), to a referendum-based fully decentralized owned and created by our token holders.
All users will be able to participate in an on-chain vote; empowering the community to drive development of the platform.

Vote

Referendum

Popular

Proposal

Create

Democracy

General Council

Technical Committee

This structure will ensure sustainability of the platform over time. Users will use this model to decide on fee adjustment, technical upgrade, metaverse evolution and so on.
